

TecnoSedia Fabric Requirements

“Customer Own Materials” - COM - Fabric Requirements

“Customer Own Materials” - COM - Fabric Requirements

All yardage requirements indicated are based upon a plain, no repeat 54"wide fabric. If the fabric has a repeat or is LESS THAN 54" wide, please use the chart below to calculate additional yardages.

	Plain	3"-14"	15"-19"	20"-27"	28"-36"	37"-45"	46"-54"
54"	0%	10%	15%	20%	25%	30%	35%
52"	10%	15%	25%	30%	35%	40%	45%
50"	15%	20%	25%	30%	35%	40%	45%
48"	15%	25%	30%	35%	40%	45%	50%
45"	20%	30%	35%	40%	45%	50%	55%
36"	50%	60%	65%	70%	75%	80%	85%

NOTE: Fabric patterns are cut to match vertically AND horizontally. Be sure to calculate both vertical and horizontal repeats. For patterns with a single repeating motif centered in the middle of the width of fabric, please use the calculation for a 36"width. Due to the unique features of some fabrics and application, fabric estimation is an imperfect science. The chart provided should be used only as a guide. TecnoSedia will not be held responsible for quantities of fabric ordered.

COM – “Customer’s Own Material”

All fabrics must be sent freight prepaid to: TecnoSedia, 199 Armour Drive, Suite A, Atlanta, Georgia 30324.

Unless specific instructions are given, TecnoSedia will determine the most appropriate way in which to apply the fabric. Please let TecnoSedia know in writing if the client has specific preferences as to the positioning or direction of a certain pattern or motif, placement of seams if necessary, face side of the fabric, or other such instructions.

Tagging Fabric

Please be sure to properly tag and identify the fabric per COM form. It is imperative that proper identifying information be included with the fabric.

Return Of COM/Fabric

Excess COM/fabric, if any, will not be returned with the order unless specifically requested at time of order. TecnoSedia will retain excess COM/fabric, if any, for sixty days upon completion of the order. After sixty days, TecnoSedia will dispose of any excess COM/fabric in the way it sees fit. Any shipping costs associated with COM packaged and returned after the original order is shipped/delivered is clients responsibility and must be prepaid.

Fabric Backing

Some fabrics may, as determined by TecnoSedia, require a backing in order to facilitate production. Client will be contacted with the appropriate cost for the shipping and backing if necessary.

Railroading/Up the Bolt

Fabric will be cut "up the bolt". On certain styles of furniture, this will require seams. When a fabric can be railroaded, clients may choose to do so to avoid having seams. Please indicate on the order if the fabric should be railroaded.
